2022 LIGHTING AWARDS

IESANZ SA/NT CHAPTER 2022 LIGHTING AWARDS

The aim of The Lighting Society is the advancement of the art and science of illumination and the circulation of knowledge to all interested parties.

The IES Australia and New Zealand Lighting Awards program provides a unique opportunity for public and industry recognition of professionalism, ingenuity, innovation and originality in lighting design and implementation.

This program is not a competition, but rather highlights excellence in lighting.

AWARD OF COMMENDATION

LiDA

LOT FOURTEEN PUBLIC REALM

WSP, OXIGEN, FORM + LIGHT, FOS LIGHTING, BUCKFORD ILLUMINATION GROUP,
PLANET LIGHTING, LUX FX

This project includes many external public spaces and a number of functional lighting effects to enhance architecture and meet public safety expectations.

Hess Smart "Totem" pole lighting was used at the North terrace boulevards and the pole lights integrate a variety of services including power, Wi Fi, CCTV and emergency intercom.

Mixing of colour temperatures between 4k and 3k was carefully done and created a comfortable and safe environment over quite a vast area.

AWARD OF COMMENDATION

LiDA

ST ANDREW'S SCHOOL

SWANBURY PENGLASE, LUCID CONSULTING AUSTRALIA, INSIGHT LIGHTING SOLUTIONS

This two level unique innovation and creative learning space also includes an overhead crane.

The lighting design was physically modelled using straws to verify the aesthetic within the unique geometry of the architecture. A continuous LED tube system runs in both horizontal and vertical planes which complement the space exceptionally.

An enormous amount of coordination and patience by the installing contractor was demonstrated to achieve this special outcome.

Other areas included trimless linear fixtures in acoustic ceilings. Nothing was regular about this design which has been crafted to inspire a future generation of creatives.

AWARD OF COMMENDATION

LiDA

LUCID CONSULTING OFFICE FITOUT

LUCID CONSULTING AUSTRALIA, IA GROUP, INSIGHT LIGHTING SOLUTIONS, LEDA LIGHTING, H.I. LIGHTING

A feature of the design is a bespoke and continuous extrusion that connects boardroom, collaboration spaces and breakout areas.

This 3k warm colour contrasts to the 4k working spaces that sit behind the entry foyer and the effect is comfortable and pleasing.
Meeting rooms and board rooms have been carefully designed using direct and indirect sources.

Lucid employed their graduate engineers to collaborate as a team in the planning of this design in conjunction with a range of local suppliers.

LUCID

AWARD OF COMMENDATION

LiDA

MURRAY BRIDGE HIGH SCHOOL

LUCID CONSULTING AUSTRALIA, COX ARCHITECTURE, H.I. LIGHTING

The central plaza space to this school building is an impressive architectural feature akin with the curving River Murray native scenery.

This project had tight budget constraints and a cost effective design was needed. The lighting solution used is simple in both concept and execution.

A continuous row of LED battens are concealed from view, and evenly up-light the feature creating a stunning visual panorama.

AWARD OF EXCELLENCE

LiDA

MARGIE'S DREAM

ARCHITECTS INK, INSIGHT LIGHTING SOLUTIONS

This residence stands out for its minimalistic and peaceful ambience. The existing villa remains true to its heritage style, whilst the extension is a on another planet from a design perspective.

The lighting design is “masterfully minimalistic” but very versatile in its conception and operation. The use of any downlight was almost completely avoided using concealed lighting to wash the room in a peaceful and warm manner.

Concealed trimless and recessed LED strip lighting was used in restraint to achieve this unique design. All areas were treated carefully and tastefully with the overall architecture and lighting combining to perfection.

AWARD OF EXCELLENCE

LiDA

HER MAJESTY'S THEATRE

AURECON, COX ARCHITECTURE, H.I. LIGHTING, INSIGHT LIGHTING SOLUTIONS,
LIGHTSOURCE AUSTRALIA, 3S LIGHTING, NIRAMAR

The entrance to the Theatre is pure Hollywood with extensive festoon lighting to the entrance canopy installed in an intricate arrangement.

The volume of the foyer is highlighted with wall grazing to give a grand sense of space while 3D bendable LED strip lighting accentuates the staircase curves.
The theatre seating features perfectly even lighting to the stalls.

Playful wall lighting (reminding us of music notes) is a feature and complements the acoustic wood panelling. Indirect coffer lighting adds comfort and welcome at the Ground floor as well as in the Royal Circle and Grand Circle above.

AWARD OF EXCELLENCE

LiDA

SHAPE OFFICE FITOUT - ADELAIDE

SHAPE AUSTRALIA, BESTEC, JPE DESIGN STUDIO, INSIGHT LIGHTING SOLUTIONS, SKS TECHNOLOGIES

Shape are construction fit out specialists and have created for themselves a unique office fitout to comfortably host its staff and display their building expertise to clients.

The 5 Greenstar Accreditation was catered for with the lighting design which carefully addresses the functional requirements of each space.
The entrance lighting is soft and restrained but perfectly highlights visual task areas.

The office is completely uniform and lit with suspended up/down linear LED extrusions. The low glare louvers give exceptional visual comfort whilst the ceiling wash optic creates a beautiful ambience and evenly lit ceiling.

MERIT AWARD

REGENCY ROAD TO PYM STREET PEDESTRIAN & CYCLIST OVERPASS

MOTT MACDONALD, COX ARCHITECTURE, MCCONNELL DOWELL, ARUP

All award winners are automatically entered into the IES North America Lighting Awards which is open for entries on a global scale.

Judging for the IES North America Lighting Awards took place in February 2022 and out of all 30 Australian entries from last year only 1 received an Award of Merit.

There's no surprise why this carefully thought out and perfectly integrated project caught the attention of the North American judging panel.
